SKILLS

Languages	Python, SQL, C++, Java, JavaScript
Libraries/Frameworks	PyTorch, Pandas, NumPy, Scikit-Learn, spaCy, Seaborn, FastAPI, Machine Learning
Tools/Platforms	Git/GitHub, Google Colab, Power BI, JupyterLab, Docker
Methodologies	Feature Engineering, Predictive Modeling, Model Evaluation, Time-Series Forecasting
Soft Skills	Decision-Making, Problem-Solving, Cross-Functional Collaboration, Multi-tasking

PROJECTS

CredScore | XGBoost, LightGBM, Power BI | Live Aug' 2026

- Architected a predictive feature space using Python and Pandas, executing complex relational joins across 3GB+ (5 datasets) of fragmented financial records.
- Developed a GPU-accelerated credit risk model using XGBoost and LightGBM to predict defaults, utilizing SMOTE for class imbalance to boost predictive recall by 22%.
- Designed an interactive Power BI dashboard integrating SHAP values to decode ML outputs, delivering risk assessment reporting that accelerated decision-making by 40%.

Product Intelligence Engine – Catalogue Enrichment | RAG, LLM, SQL | Live Jul' 2026

- Orchestrated an 8-stage automated Extract, Transform, Load (ETL) pipeline with deterministic decoding, executing shorthand parsing and unit conversion for 1,000 rows in 7 seconds.
- Deployed a FastAPI-based Retrieval-Augmented Generation (RAG) system grounded in a custom spaCy knowledge graph, enhancing enriched data quality scores from 51.2 to 78.3.
- Integrated an adversarial Large Language Model (LLM) judge with a confidence-gated review system, achieving a 97% data fill rate and 100% taxonomy coverage.

TradeFlow AI | XGBoost, yfinance, Streamlit | Live Jan' 2026

- Constructed an automated yfinance API data pipeline to stream real-time market data with sub-800ms latency for live prediction workflows.
- Trained an XGBoost ML model for time-series predictive analytics using Scikit-Learn, engineering technical indicators to achieve 64% directional accuracy.
- Launched a Streamlit web app for live stock tracking, predictive insights, and KPI reporting, translating models into a dashboard processing 1,200+ data points per minute.

TRAINING

DSA Bootcamp: Master Data Structures & Algorithms | LPU Summer Internship Jul' 2026

- Developed "LifeLine", a zero-dependency C++17 disaster response simulation system powered by custom priority heaps and 10+ graph traversal algorithms to reduce emergency routing latency threefold.
- Optimized memory management overhead by implementing cache-aligned data structures and dynamic programming patterns, accelerating overall execution throughput by 35% in high-load testing.
- Rigorously benchmarked and stress-tested 50+ custom algorithmic routines under extreme edge conditions, locking in O(N log N) average-case time complexity and eliminating thread concurrency bottlenecks.

Data Analytics Job Simulation — Deloitte | Virtual Experience (Forage) Feb' 2026

- Executed enterprise-level data analysis and forensic technology workflows, identifying data anomalies across 50,000+ transactional records to uncover hidden business insights.
- Performed comprehensive data profiling and root-cause analysis to validate data hygiene, ensuring 100% schema integrity for structured financial reporting.
- Delivered actionable, data-driven recommendations and interactive visual dashboards to support complex business scenarios and stakeholder decision-making.

CERTIFICATES

- Generative AI | Udemy Aug' 2026
- Database Management System | Infosys Jul' 2026
- Oracle Certified AI Foundations Associate | Oracle Jun' 2026

ACHIEVEMENTS

- Advanced to the 3rd round of Flipkart's flagship pan-India hackathon, demonstrating advanced algorithmic thinking. Jan' 2026
- Secured a Top 30 position in CodeXtreme 4.0, an intensive Java coding competition hosted by iamneo. Apr' 2026

EDUCATION

Lovely Professional University	Jalandhar, Punjab
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.96	Aug' 2024 – Present
RPS Public School	Patna, Bihar
12th Science; Percentage: 71.6%	Apr' 2021 – May' 2022
